Acknowledgement.

The author would like to thank R.H. for instructive discussions, which have added to my understanding of certain positions, and loaned me the courage to make assessments of them.

Foreword

The New Anti-Najdorf arises from the moves 1 e4 c5 2 \$\infty\$ f3 d6 3 d4 cd 4 \$\infty\$ xd4 \$\infty\$ f6 5 \$\infty\$ c3 a6 6 \$\infty\$ e3!

The move 6 全e3 is not itself new, but has recently gained fresh force from two promising and original White lines against the major alternatives. The first of these alternatives, 6 ... e5, is examined in part I. Our recommendation for White is Hubner's 7 包f3 豐c7 8 a4! — a move that posed Portisch serious problems in the 1980 Candidates Matches.

In part II, where Black defends with 6 ... e6, a powerful new attacking plan has recently been discovered. With 7 ***** d2!** White intends to force a favourable Keres-attack like formation by following up with f3 and g4. A further advantage is that Black cannot transpose to normal and solid Scheveningen systems. This dangerous line has already found favourites among the top English Grandmasters Nunn, Chandler and Short. It is worth noting that certain New Anti-Najdorf positions can be reached via a Dragon Sicilian as well. These interesting transpositions can be found in section 3.

So far Black's attempts to sidestep the two main Anti-Najdorf variations have not gone well. 6 ... ②g4?! can be met by 7 兔c4 ②xe3 8 fe!? e6 9 0-0 兔e7 10 豐h5 +=. PART I

The New Anti-Najdorf I; 6 \&e3 e5

Introduction

1 e4 c5 2 ② f3 d6 3 d4 cd 4 ② xd4 ② f6 5 ② c3 a6 6 ② e3 e5 7 ② f3!?

This is the basic position of the New Anti-Najdorf with 6 &e3 e5 7 包[3!?; 7 ... 臀c7 preventing 8 & c4 is the most natural reply, as 7 ... \(\hat{\pma}\) e6 appears suspect in view of 8 42g5! fone of the points of 7 263 -see game /1. Other tries are 7 ... b5? 8 a4! b4 9 20d5! [Nunn] or 7 ... 40c6?! 8 요c4 요e6?! (8 ... 요e7 9 요g5! += Westerinen) 9 &xe6 fe 10 包g5 臀e7 11 曾f3 h6 12 曾h3 公d8 13 夏b6! 土 [Suetin]. Also possible are 7 ... 盒e7 [games 2-5] and 7 ... h6 [games 7-121, but in each case White secures control of the d5 square after 8 &c4. In some lines Black meets \$2.04 with 2e6 and 2xe6 with fe, but White is frequently successful in attacking the doubled pawns.

West German League 1984 1 e4 c5 2 9 f3 d6 3 d4 cd 4 9 xd4 9 f6 5 40c3 a6 6 &c3 e5 7 40f3 h6 8 &c4 இe6 9 @xe6 fe 10 @h4 @c6 11 @g6 面g8 12 智e2 公行 13 分xf8 国xf8 14 0-0-0 b5 15 g4 b4 16 @a4 智a5 17 b3 智b5 18 智信 含g8 19 智g2 d5 20 f3 d4 21 点d2 d3 22 点e3 dc 23 出xc2 其fd8 24 h4 9:d4+ 25 &b2 @e2 26 @e5 のf4 27 物自 Exdt 28 物xb5 ab 29 Exd1 40g2 30 &f2 Ec8 31 40d3 Ed8 32 今e2 單c8 + 33 表b2 氧d8 34 今c2 用c8 ± 35 会d2 用d8 36 息g3 h5 37 g5 包d7 38 会e2 Ec8 39 Ed2 会f7 40 会に 9日41 9xf4 ef 42 其xd7上 含e8 43 Ed2 fg + 44 exg3 Ec1 45 Ed4 Eg8+46 会f4 Eh1 47 会g3 用g1+48 也h2 田a1 49 田xb4 田xa2+ 50 也e3 国a5 51 约14 约17 52 约e5 约e7 53 f4 1:0

Thus the alternatives. Now [after 7 ... 瞥c7] we consider the two critical choices by White:

8 兔g5!? [Section 1] and 8 a4! [Section 2]. A quiet plan such as 8 兔e2 intending 0-0 allows Black to obtain a comfortable game as in the variation 6 兔e2 e5 etc.

Section 1: 7... 豐c7 8 息g5

In the year 1975 the two games Razuvaev-Sigurjonsson [game 13] and Sigurjonsson-Gligoric [game 14] attracted attention to the line 8 \$95 \$67 9 a4 66 10 \$62!, enabling White to control the centre with \$24 and gradually increase pressure against the 46 pawn.

It soon became apparent that the critical variations were those where Black attempts ... h6 and [after £h4] ... g5. Bronstein fared well against this idea in his game with Savon [game 15], but other move orders were tried out [games 16 and 17], with results that can be assessed as unclear. Finally the best plan of an immediate ... g5 [after 8 £g5 \$\frac{1}{2}\$bd7 9 a4 h6! 10 \$\frac{1}{2}\$b4 g5!?] was demonstrated by Sunye against Shamkovich and later-by Szekely [games 18 and 19]. Although Sunye lost the result had nothing to do with

the opening.

White doesn't seem to make much progress with &xf6 [after ... h6] either [games 20 and 21]. Nor is Black advised to waste time! [game 22].

Section 2: 7... 營c7 8 a4! [Hubner]

In 1980 Hubner surprised his match opponent Portisch with the new move 8 a4 [!]. White intends 9 a5, retaining the options of Ag5 or Ad2 [and Ac4]. Sometimes he threatens Ad5, intending to recapture with the e pawn and create complex positions with pawn majorities on opposite wings.

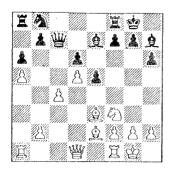

Black's biggest problem is the development of the bishop on c8; after 8 ... b6 White can transpose to favourable 2,25 lines [see section 1]; after ... 2,26 White has 3,25; and ... h6 preparing ... 2,26 weakens the kingside white squares, whilst 2,35 is provoked to even greater effect.

Despite the good results obtained by White with 8 a4 [!], practice is surprisingly sparse. In the first match game Portisch defended with ... ②bd7 and ... ②c5, but ran into trouble after 11 ②d5! [game 23]. In a recent game [game 24] Chandler copied the Portisch maneouvre with success, if not with conviction. Incidentally Csom's suggestion 8 ... ②bd7 9 a5 b5?! 10 ab ②xb6 cannot be recommended after 11 ②xb6 響xb6 12 ②b5+ ±.

In the third match game Portisch evolved the plan of an early ... 0-0 followed by ... \(\Delta e6 \), but after White's \(\Phi g5 \) forcing the exchange of white-square bishops Black's weaknesses become apparent, in particular the d5 square. Portisch was lucky not to lose [see game 25] but this time his emulators fared worse [games 26 and 27].

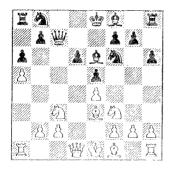

These experiences led theory to recommend 8 a4 \$.e7 9 a5 0-0 10 \$.e2 \$.e6 11 0-0 h6 for Black, preventing 7\(\text{y}\)g5. Then on 12 7\(\text{d}\)5 \$\text{\text{\text{Q}}}\)xd5 13 ed \$.\text{\text{\text{g}}}\)5 14 c4 \$.\text{\text{\text{h}}}\)7 Black is

upposed to have good play, beginning with ... \$5.

This position resembles the one obtained by Portisch in game 23, but White's knight is less well placed on 13 than d2 [Black has not wasted time with ... \$\Phi\d7\c5\c47\c5\c47\]. It was tested in Nunn - Howell [game 28], where White eventually won.

The most frequently tried defence, however, is the immediate 8 ... h6 9 a5 \(\Delta e6. \)

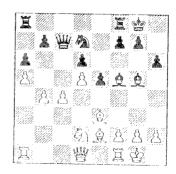

Here the thematic White move is 10 \$\delta\$\) d5!, when 10 ... \$\delta\$\) xd5 is untested but after 11 ed \$\frac{1}{2}\$ f5 12 c4 \$\frac{1}{2}\$ e7 13 \$\frac{1}{2}\$ e2 0-0 14 0-0 should transpose to Nunn - Howell [game 28]. Instead 10 ... \$\frac{1}{2}\$ xd5 [games 29 and 30] appears to weaken the light squares [e6, f5, g6] but Black hopes for compensation through rapid development.

The quiet 10 兔e2?! ⑤bd7 11 0-0 should not be met by 11 ... 兔e7?! because of 12 ⑥h4! setting some problems [game 31], but by 11 ... 豐c6! which appears to equalise [games 32, 33 and 34]. A similar plan is used in game 35.

Finally we look at various tries after 8 a4 b6 [games 36, 37 and 38]. The critical move here, however, seems to be 9 \(\text{Rg5} \) \(\text{Dbd7} \) 10 \(\text{Dd2!}, \) returning to variations assessed as favourable to White in section 1.

Game 23 □ Hubner Portisch Mark - Abano Terme 1980 (1)

1 e4 c5 2 包f3 d6 3 d4 cd 4 包xd4 包f6 5 包c3 a6 6 兔e3 e5 7 包f3 豐c7 8 a4! 兔e7 9 a5 包bd7 10 包d2 包c5 11 包d5!? Now White should play 17 響b3! ± [Hubner] or 17 魚xg5 hg 18 響b3! ± [Hubner] retaining control on the dark squares and more realistic prospects on the queenside than

Black on the kingside. Instead he misplaced his knight and his chances evaporated rapidly.

PART II

The New Anti-Najdorf II 6 & e3 e6

Introduction 1 e4 c5 2 句f3 d6 3 d4 cd 4 句xd4 句f6 5 句c3 a6 6 兔e3 e6 7 對d2!

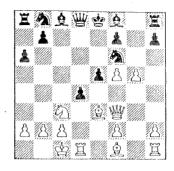

With his sixth move Black introduces a Scheveningen set-up, as Portisch did with his third Black against Hubner in the 1980 match. White's reply, which prepares f3, 0-0-0, g4-g5 became all the rage in 1985. There were other ways to avoid the main lines, however, and we'll have a quick look at those first.

The direct 7 g4 [?!] leads to Perenyi's piece sacrifice: 7 ... e5! 8 全f5 g6 9 g5 gf 10 ef d5 11 響f3 d4 12 0-0-0 and we have reached the critical position:

see following diagram

Here Nikitin comments only "White lacks sufficient compensation after 12 ... "Ye7" but he fails to

offer any analysis. It would be interesting to learn the outcome of 13 \(\hat{L} \times \text{d4!?}\). Encyclopaedia B Second edition gives 12 ... \(\hat{L} \text{bd7!}\) with some not very convincing notes to a Chiburdanidze game; however, it must be granted that the whole variation looks somewhat risky.

Another try is 10 g4 in the main f4 lines [i.e. 7 f4, 8 對f3, 9 兔d3 etc] and we look at some examples of this plan [games 39-46]. It may be significant that strong grandmasters such as Timman, Hubner and Chandler, appear to have abandoned this variation after only a few experiments.

We also look at some games involving f4, 曾d2, 鱼e2 and opposite castling [games 47-50]. This is rather similar to the New Anti-Najdorf [where White plays f3] and may even transpose.

Section 1:

Returning to our preferred continuation [7 \$\mathbb{\text{W}}\$d2!] the material comprises of some 24 games. Since the White plan [of a quick 0-0-0 and Kingside push] will proceed whatever, the material is sectioned according to Black's defensive scheme. In section 1 we see what happens when Black castles short; in section 2 Black opts for rapid expansion on the queenside; and in section 3 we look at some odds and ends, including the central counterthrust ... d5.

Black Castles Short

In this section we look at some examples where Black plays 0-0, braving the White storm in the hope that his counterattack will arrive first [games 51-59]. As White always

castles long, such positions call for an enterprising spirit and exactitude in your calculations!

The move 8 a3 is out of fashion; in this game Black stands well after 16 ... b4! An enterprising game with a nice finish, nevertheless.

Section 3:

Others [... d5]

In this section we survey various under-researched ideas: Black can try long castling, for example [games 68 and 69], although that doesn't seem to go down too well. More pertinent is the attempt to break up the centre with an early ... d5 [games 70-73] or even to combine this idea with an early ... Dc6 [game 74].

First, though, we see an example of the 2xb5 breakthrough with Black's queen on c7 [game 67]. This leads to an endgame with 3 pawns for a piece and must be assessed as +=; the idea is far from new and recurs throughout the Sicilian, e.g. Fischer - Najdorf 1960 saw it arise from the Keres attack: I e4 c5 2 2013 d6 3 d4 cd 4 20 xd4 2016 5 包c3 e6 6 g4 a6 7 g5 包fd7 8 兔e3 b5 9 a3 身b7 10 智d2 兔e7 11 h4 勾c5 12f3 對c7 13 0-0-0 勾bd7 14 兔xb5! ab 15 ②dxb5 智c6! 16 ②xd6+ 夏xd6 17 豐xd6 0-0-0? 18 豐xc6+ 夏xc6 19 b4! @a4! 20 耳d6! 由c7 21 耳xc6+ 由xc6 22 ①xa4 邓a8 23 约c3 邓xa3 24 始b2 用ha8 25 f4 约b6 26 克xb6 约xb6 27 Adl and White had a winning position although he contrived to draw it.

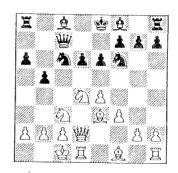

Finally, in games 75-80, we see a very interesting transposition to the New Anti-Naidorf from a Dragon defence. After the moves 1 e4 c5 2 10 f3 d6 3 d4 ed 4 10 x d4 10 f6 5 De3 De6 6 g3 光g4 7 f3 光d7 8 未e3 e6 we reach a typical Anti-Najdorf when White continues with 臀d2, and g4, and Black plays ... a6.

A T.U.I. OPENINGS BOOKLET

The move 6 \(\Delta e 3! \) has become the most critical test of the Najdorf variation, where many other main lines have been analysed to exhaustion. Black's problem is the recent interpretation of the variation, as pioneered by Grandmasters Short, Hubner, Nunn and Chandler, which can often force transposition to standard Sicilian formations favourable to White. In this book Gisbert Jacoby details these transpositions fully, and gives White a complete new Anti-Najdorf weapon guaranteed to unnerve any unprepared opponent. In addition many original suggestions are incorporated in the notes, based on Jacoby's private analysis with several top Grandmasters.

The Author

Gisbert Jacoby is a professional West German chess coach, living in Hamburg. He has played in the 1st Division National Bundesliga and currently edits the fast-growing magazine Chessbase.
